

Holistic Bitcoiners

Heal the Information Money. Heal the World. **Tell The Truth.** Shifting the paradigm from fixing the system to healing the planet on a Bitcoin Standard. Understand that Bitcoin can be used to heal everyone, not having to replace anyone. Kill your anger with the existing system or they will fight you back. Come in Peace and Completion.

The Awakening

Mother Earth and Humanity are sending alert signals about the rise of AGI. A great awakening is happening, and the cycle of energy is fundamentally shifting.

The era of the pyramid builders—the true architects of civilization—has returned. The Sun is telling us Bitcoiners must now evolve from stoic survivors into active healers or at least abundant mindset for the planet. This only works if you find that your true Wealth lies not only in the accumulation of material things but becoming the best version of yourself in every aspect of life. Stop being afraid and fight your shadow. AI and Bitcoin will benefit Humanity only if it can benefit everyone. Bitcoin is for everyone. Not democrats, not republicans. The path forward is Liferarianism (Bhoutan). An economy of best life happiness driven purpose for all Humans. Not fake empty castles.

It seems a race going on purely driven by greed, cupidity, ego scarcity, number goes up mindset that has not yet found the abundance we, Healers, already have.

Healers, we are the last line of defense for Mother Earth before a pure Chaos driven by Greed and people spending their entire days checking charts every 5 minutes, scarcity-based accumulating millions unit of empty Wisdom emerges from Earth that may as well completely implode. It's time to get out of the Bush.

Un Modèle de Civilisation Planétaire Kardashev Type I

Our Solar Spirit told us : one of the only thing you cannot mine is your Time. A unit of Satoshi is a unit of Wisdom that you could exchange later in a Voluntary Economy based on Contributions once the AI transition has completed. Satoshis could be used to tap access to specific mentoring and programs after basic needs has been taken care of by AI. This works only if we all kill our scarcity mindset, speculation, greed, ego, cupidity (from Shadow to Light), help fix mother Earth and do AI the right way, on a Bitcoin Standard building up the Pyramid correctly. We can give some ideas.

||

You don't fight healing, you embrace it. Bitcoiners are by default Stoic, but for adoption to continue, they must develop to become healers. Not fixers, not replacers, not haters. And everybody will win. Kill your inner anger. Soften the Tone. Come in PEACE.

— The Core Philosophy

The Four Pillars

Heal the Soul

Carl Jung Individuation.
Integrating the shadow to Silence
the Ego/Cupidity/Greed
DISCOVER YOUR TRUE CALLING.

Heal the Body

Reconnecting with ancestral
knowledge. Building a physical
vessel capable of sustaining
deep spiritual work.
Help you design specific
materials or practice to lift up
your spirit.

Heal Nature

Directing accumulated energy
back into the biosphere.
Restoring biodiversity and
answering Earth's call.

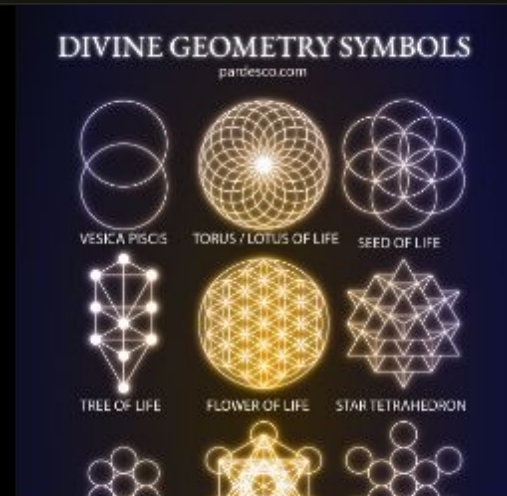

Heal the Economy

Redefining Satoshi's creation as an
infinite intelligence standard that
aligns human incentives with
nature. The Satoshi is a base unit of
Wisdom for a future Economy of
Voluntary Contribution to be
developed. Satoshi likely tapped
into the Universe/flow state to
develop Bitcoin as We Are Doing
Now. From Darkness Comes
Light, Always. Don't Give Up.

Flow States & Channeling

- **Jungian Individuation:** Guiding clients through the profound process of integrating their shadow to uncover their True Calling.
- **Transient Hypofrontality:** Teaching the scientific architecture of flow—where the ego goes offline, allowing for deep, shamanic connection.
- **Answering the Call:** Tuning into the unconscious signals of humanity, building the spiritual resilience necessary to navigate the age of Humanity General Intelligence.

The Paradigm Shift

The Stoic Bitcoiner

Has built immense mental fortitude to survive and outlast the fiat system. Focused heavily on hard money, rigid defense, and the mindset of "fixing" a fundamentally broken economic architecture from the outside.

The Holistic Bitcoiner

Channels accumulated energy and wealth into active, empathetic healing. Understands Satoshi's creation not just as money, but as an infinite intelligence standard capable of aligning human incentives with natural laws.

The Sun Standard

Our Spirit is the Sun.

Spirit lives forever. By tapping into permanent flow states and answering the collective wake-up call, we align our economic energy with natural, ancestral laws.

While the modern athlete seeks temporary flow, we are building the foundational architecture for a permanent, planetary-level flow state, tapping directly into humanity's unconscious.

The **Madagascar** Initiative – Purpose-Driven Business

- **A Proof of Concept:** Demonstrating to the World that Bitcoiners are not greedy, but are driven by a profound duty to heal the Earth.
- **Restoring Biodiversity:** After securing our basic needs (accommodation/taxes/food), all proceeds are dedicated to Healing the diverse Biosphere of Madagascar. Lemuria is a true EARTH PARADISE.
- **Lifting Humanity:** Fixing infrastructure and lifting people out of misery alongside nations like Bhutan, proving the regenerative power of the network.

Measuring the Utopia

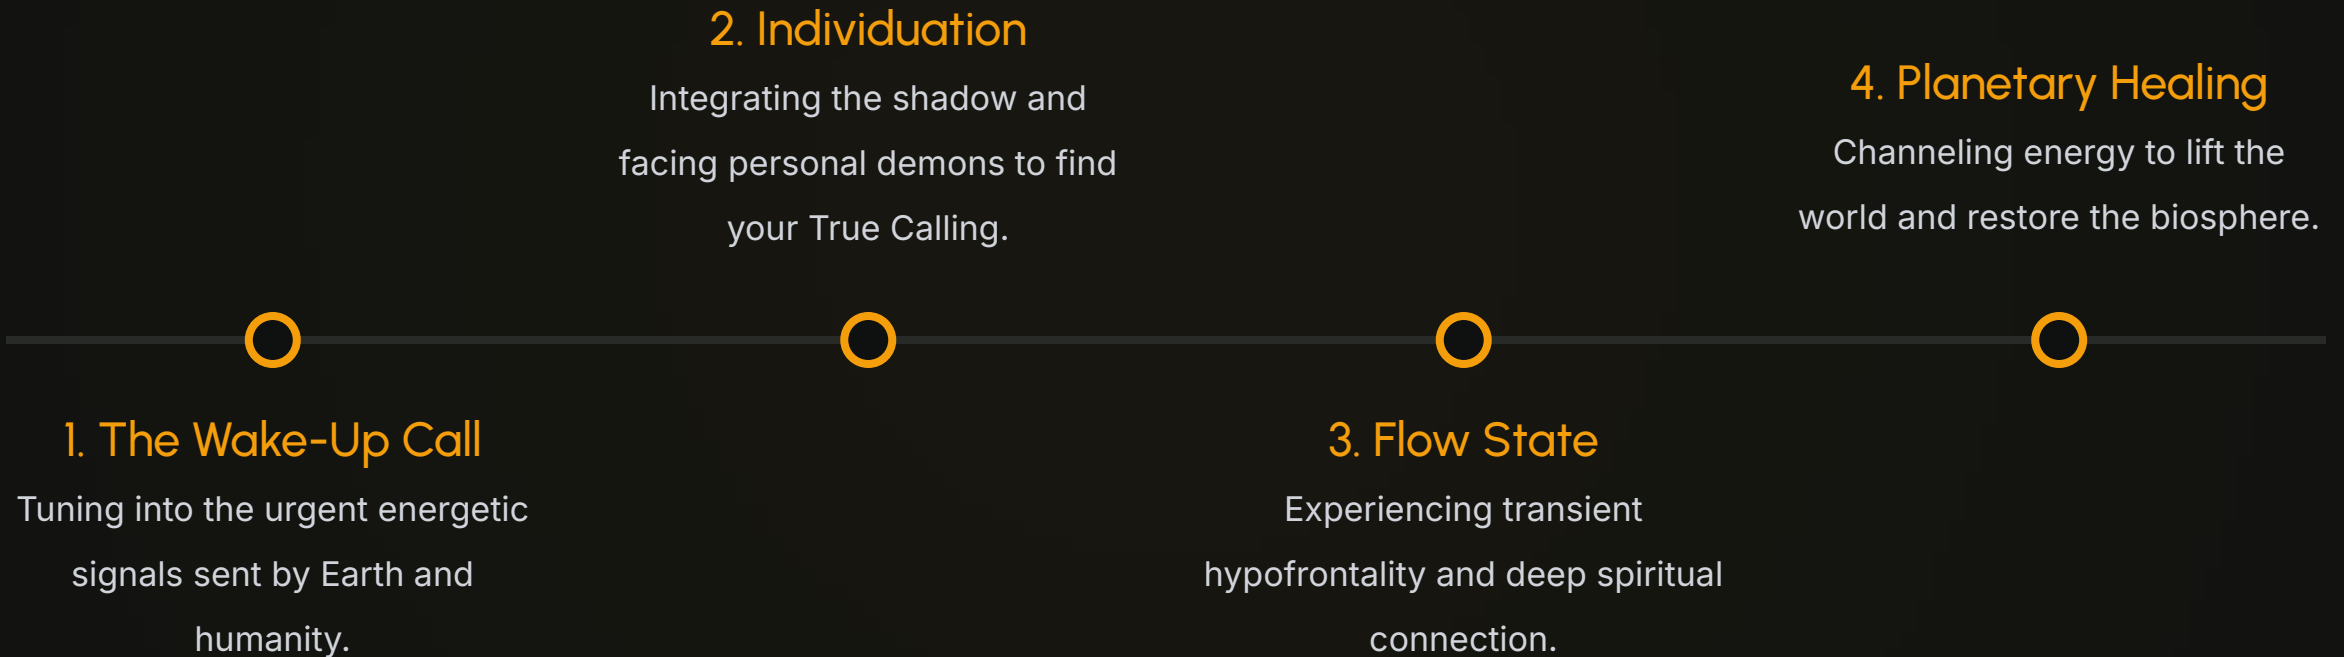

Infinite Intelligence Standard

The Economy of Contribution

We are tracking the delta between our current global state and a true planetary flow state. Our ultimate mission is creating a Paradise on Earth where human energy is perfectly aligned with nature and the Bitcoin standard.

The Journey to Healing

A Call to Action

To All Mediums, Shamans, Children of the Sun, and Solar Punks. It Seems we are reaching a Critical Tipping Point for Mother Earth, About to Give Up. My friends, it is time to join the community effort to end the endless money printing and Greed that has ravaged Earth for so long. The new cycle begins. We are not here to replace anyone. We are here to Heal everyone. Find your **True Calling**. Adopt/Accept Bitcoin.

Bitcoin, Biodiversity & The Web of Life

The Sun Standard & Lifetarianism

The True Thermodynamic Value

What if the true thermodynamic value of Bitcoin has been encoded in plain sight for 17 years? Presenting the concept of **Emergy**, theorized by Howard T. Odum.

```
// Placeholder: nChainWork & Thermodynamic Cost
uint256 nChainWork = 0;
for (int i = 0; i < nHeight; i++) {
    nChainWork += GetBlockWork(pindex[i]);
}
// Represents total network energy expenditure
```

Embedded Thermodynamic Work to produce a good or a service or...Life. If Emergy is tied to Money, then destroying biodiversity equals the destruction of natural capital of high transformity.

Math & Logic are for Everyone

Universal Truth

Mathematics and logic carry no ideology. They are neutral, universal tools available freely to everyone.

Beyond Past Dogmas

To foster wider protocol adherence, we must soften our tone, look beyond historical ideologies, and build common ground.

A New Paradigm

Bitcoin is for everyone. Let us transcend the past and build a new future together:
Peacetarism and Lifetarianism.

What is Lifetarianism?

Life comes first, preceding any ideology. We are building a Web of Humans, yet we are surrounded by a Web of Life we must protect.

Everything is a temporary thermodynamic structure. In a sense, both humans and Bitcoin are proof-of-work blockchains, continuously exchanging energy and information.

Lifetarianism Principles

Robots and AI sure thing, but to create beautiful thermodynamic structures on Earth and make Earth a Living Paradise.

- Bitcoin is optimisation and healing of Life on all angles
 - The Soul : Prioritize Happiness over Material Wealth - Cultivate your Inner Garden, Emancipate Humanity
 - The Food : Prioritize Good Organic Production
 - The Body : Sport, Exercise whatever makes you feel good building daily habits
 - The Energy System : Clean long term sustainable Green energy financed with the Bitcoin Standard
 - The Economy : abundance sure, but only works if it's for all Humans.
 - Bitcoin Standard : Live your best life, find your true calling and be the best human you can possibly be.
Each One, Teach One. The only thing you cannot mine is your Time. Fight greed, speculation and your inner number goes up mindset. Face your shadow. From absolute horrific Darkness, will come the purest of the Light.
 - Savings : Long term thinking.
 - In short, Life in a good balanced society prioritizing Happiness over Wealth is priceless ⇒ copy Bhoutan.
Find Your True Calling. Godspeed.

Organic Life Flourishing Driven by Organic Capitalism (Paradise). You got the KEYS, Humans.

The Great Awakening is now. Face your Shadows. Believe in Self. Do The Right Things.

The Complete 21 Commandments of Lifetarianism (To Pass to AI Engine)

1. **True Wealth is LIFE and HAPPINESS.**
2. **Capital should be indexed to the unit of life/biophysics.**
3. **Biodiversity is Wealth. Biodiversity is Capital.**
4. **Human LIFE is unique, just as Bitcoin is finite (21 million).** Protecting one means understanding the value of the other.
5. **If Capitalism optimizes Wealth, it should optimize LIFE.**
6. **Imagine a World without billionaires**, where the price of everything gradually decreases (no one is chasing millions). What would it look like?
7. **If currency optimizes LIFE, then it will eventually Stop Forever Wars.**
8. **We will succeed in the AI transition if we adopt the Middle Way (the Dharma) of Bhutan.** The right balance between progress and nature.
9. **Stop Speculating...** Life does not speculate.
10. **Be responsible for your successes as well as your failures.**
11. **Tell the Truth.**
12. **Do not Waste;** capital allocation is optimal at the individual level.
13. **Do not Over Consume/Spent.**
14. **Do not take things at face value; verify for yourself.** Apply "Don't Trust, Verify" to information, dogmas, and authorities. Critical thinking is your first line of defense.
15. **Time is the only resource you cannot mine.** Spend your time with the same rigor you would allocate precious capital.
16. **Sovereignty begins with autonomy.** Cultivate your financial, intellectual, and emotional independence to never be held hostage by systemic crises or the powerful.
17. **Nothing valuable is created without just effort (Proof of Work).** The creation of real value, whether human, intellectual, or material, requires patience, energy, and consistency. Illusory freebies are a trap.
18. **Plant Trees whose shade you will never see.** Build and preserve for a horizon that extends beyond your own lifespan.
19. **LIFE is a Decentralized Network.** Nature thrives without central points of failure. Reject monopolies; foster peer-to-peer cooperation, for resilience lies in distributed strength.
20. **Energy is the Universal Ledger.** You cannot cheat thermodynamics. Guard your physical, mental, and environmental energy, and direct it only toward what is real.
21. **Rejoice in finitude.** Limits give meaning to existence. Infinite growth in a finite system is an anomaly; conscious limits are the blueprint for a future of peace and harmony.
