

Bitcoin, Biodiversity & The Web of Life

The Sun Standard

The True Thermodynamic Value

What if the true thermodynamic value of Bitcoin has been encoded in plain sight for 17 years? Presenting the concept of **Emergy**, theorized by Howard T. Odum.

```
// Placeholder: nChainWork & Thermodynamic Cost
uint256 nChainWork = 0;
for (int i = 0; i < nHeight; i++) {
    nChainWork += GetBlockWork(pindex[i]);
}
// Represents total network energy expenditure
```

Embedded Thermodynamic Work to produce a good or a service or...Life. If Emergy is tied to Money, then destroying biodiversity equals the destruction of natural capital of high transformity.

Math & Logic are for Everyone

Universal Truth

Mathematics and logic carry no ideology. They are neutral, universal tools available freely to everyone.

Beyond Past Dogmas

To foster wider protocol adherence, we must soften our tone, look beyond historical ideologies, and build common ground.

A New Paradigm

Bitcoin is for everyone. Let us transcend the past and build a new future together:
Peacetarism and Lifetarianism.

What is Lifetarianism?

Life comes first, preceding any ideology. We are building a Web of Humans, yet we are surrounded by a Web of Life we must protect. Everything is a temporary thermodynamic structure. In a sense, both humans and Bitcoin are proof-of-work blockchains, continuously exchanging energy and information.

Encoding the Cost of Life

Creating a Paradise on Earth

Earth is our mother. We are one giant web of life provided temporarily by our Sun.

By encoding the precise thermodynamic cost of any structure back to Bitcoin, we can objectively value goods, services, and Life itself. This protects our environment and ensures a harmonious future, even as we explore the cosmos.

Stewards of the Future

With the rise of Artificial Intelligence, we are acquiring unprecedented power on our planet. Let us use this capability to make things right—for us, for our children, and for the entire web of life.

“

Number goes up is good.

*Freedom goes up is freaking
awesome.*

”

But Life goes up is priceless.

The Value of Human Life

21M
Coins

The Lifetarian Perspective

So what is exactly the price of a human life in lifetarianism? Given its intrinsic, unyielding thermodynamic value within our finite universe...

It should be 21 million coins, Satoshi would agree, wouldn't he? One node is just a monad of the entire Universe Network.

Fix the Money, Fix the World.

Bitcoiners for Freedom

Bitcoiners for Peace

Bitcoiners for Life

The Sun Standard – For a Solar Civilisation

Where Solar Punk meets Cypher Punk. One Humanity, One Currency.
Emergy Money.

The Life Standard is something you live every day—cherishing the little things, your loved ones, your inner peace and making this World a better place. Because when you can protect your life, your soul and your energy : you can focus on building your inner/outer garden. Find back the Human inside you and kill your demons. Rise, children of the Sun. It's time to make it right. We will figure out the rest together, use AI for Emergy, Dharma, Wu Wei, Karma, forgive yourself, build together, decide for yourself what true Wealth is and making this World a beautiful place. We believe the end goal is that every human should get what they want in life... Optimal Resources Allocation for all. If we can dream it, we can make it. We will encode the value of biodiversity on the blockchain preserving it from our own demons of greed. In a world of abundance we must kill the greed and the demons inside us. Unfortunately, no else than yourself can do this evolutionary process for the species. And it is no coincidence if the emission curve of Bitcoin can be expressed on a golden ratio coarse-graining, pure neguentropy of life. We are one with the Universe, and the Universe has our back. We are stardust looking at the stars. The Great Awakening, be the Hero of your own Universe. You cannot unsee what you have seen. What a paradise you live in, children of the Sun. Hello from Southern Hemisphere Madagascar. Pascal has almost no bitcoins but he has everything he needs : a beautiful happy life taking care of people he loves. He just found balance in the chain of life. Everybody should get the same beautiful life he has. Find inspiration with Bhutan, make your people happy. We are one Humanity. Pascal Ranaora is gentle enough to host me from time to time, not same timeline but same vibe.. pyramid builders type. He has been through a lot of shadows and was looking to help humans. Like Satoshi in 2008. He fought back. A spark of pure curiosity and intuition exploring all aspects of life, philosophy, maths, physics, psychic abilities remote viewing, out of body experimentation, deep meditation theta waves, neurosciences, self-awareness, love, music, breathing, running, peace, empathy, aliens, history, evolution, sports, economics/degrowth/post-growth. He just reconnected with the entire Universe of possible outcomes. You are capable of much more than what you think. Face your shadows, be strong, you got this, from Shadow to Light. Separate you from your own Darkness (AI on Carl Jung psyche, it took Pascal a few months). We will get, there, together. Each one, Teach one. Be nice to each other and live your best life. All your Gods are watching you. If Earth cannot Heal we will have to cut Humans from the giant chain of life universal network. Don't let your shadow win. No one is coming to save you. Trust in the Universe. Have a nice day.
